January 20, 2020

RoHS and REACH-SVHC CERTIFICATION

The O-Ring Store represents that all rubber products are in conformance with applicable provisions of the regulations known as the REACH Candidate List (EC 1907/2006). Reach (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Commission (EUC) Regulation on chemicals and their safe use. As of January 16th, 2020 there were 205 substances on the Substances of Very High Concern list and 43 substance on the Authorization List.

The O-Ring Store represents that all rubber products are in conformance with the following:

- Its products do not currently contain substances listed on the SVHC or the Authorisation List, both as published by the ECHA on its website on the date of this statement, in excess of the applicable legal thresholds.

- All substances contained in its products are currently in substantial compliance with the current conditions and restrictions of Annex XVII of the REACH regulations.

Although we at The O-Ring Store produce only molded rubber products, which are not truly the intended targets of the European legislation, we are compliant to RoHS 3.

All rubber compounds are compliant to RoHS 3 legislation (EU 2015/863) and RoHS Directive 2011/65/EU dated 08 June 2011 and do not contain any of the following ingredients:

- Lead
- Mercury
- Cadmium
- Hexavalent Chromium
- Polybrominated Biphenyls
- Polybrominated Dibenzyl Ether
- Bis(2-Ethylhexyl) phthalate
- Benzyl butyl phthalate
- Dibutyl phthalate
- Diisobutyl phthalate

Trace amounts of these element/molecules could theoretically be present in extremely low levels in any of our material without our knowledge. The current threshold for reporting is 0.1% of total mass (0.01% for Cadmium) and the naturally-occurring trace amounts are well below this limit.

We appreciate your business and look forward to working with you on a long-term basis. Satisfied customers are our best advertisement, so I encourage you to give us feedback on how we’re doing.
